17:30 READING: 500 YEARS OF THE PEASANTS' WAR: RESISTANCE AGAINST LAND THEFT AND EXPLOITATION

FLORIAN HURTIG

This reading is about a 500-year war against peasants, which began with the defence of the commons, the collectively used pastures and forests. This was followed by what was probably the largest mass uprising in Europe for a fairer social order – which entered the history books as the Peasants' War and is currently celebrating its 500th anniversary.

500th anniversary. Florian Hurtig analyses this uprising, its suppression and the perpetuation of a war against the peasantry as a prerequisite for modern capitalism and describes a renewed attack on peasants: The expropriation of their relationship to nature (GERMAN)
